File Manager Directory Selection

Directory Selection

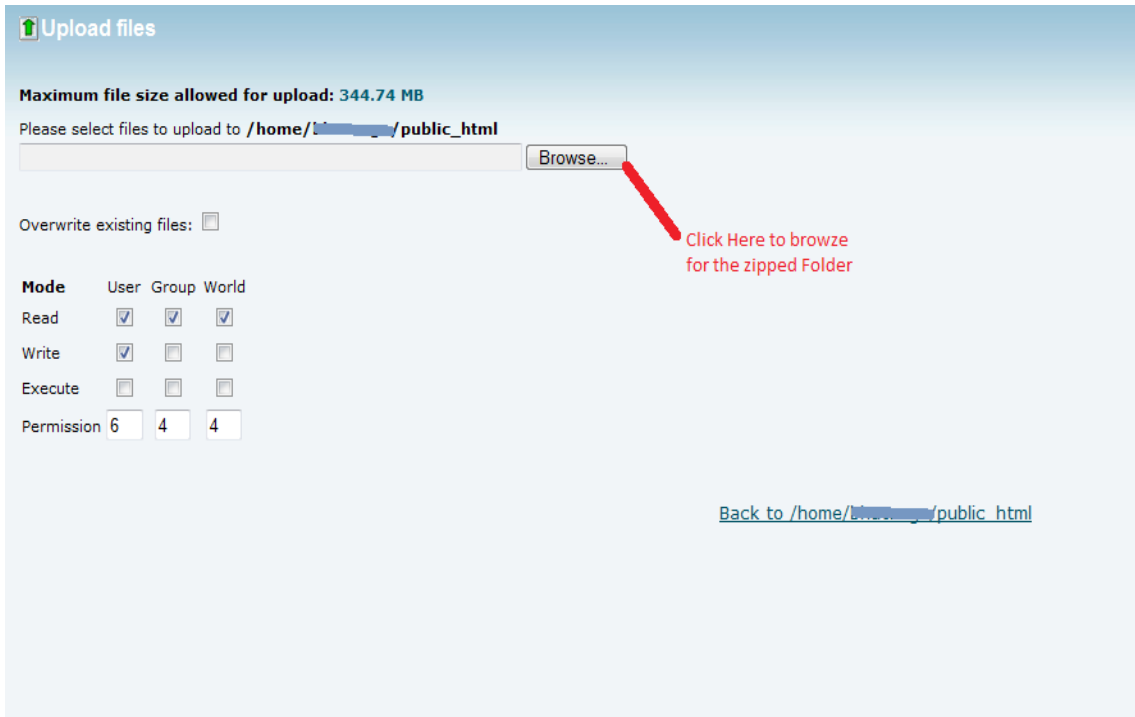

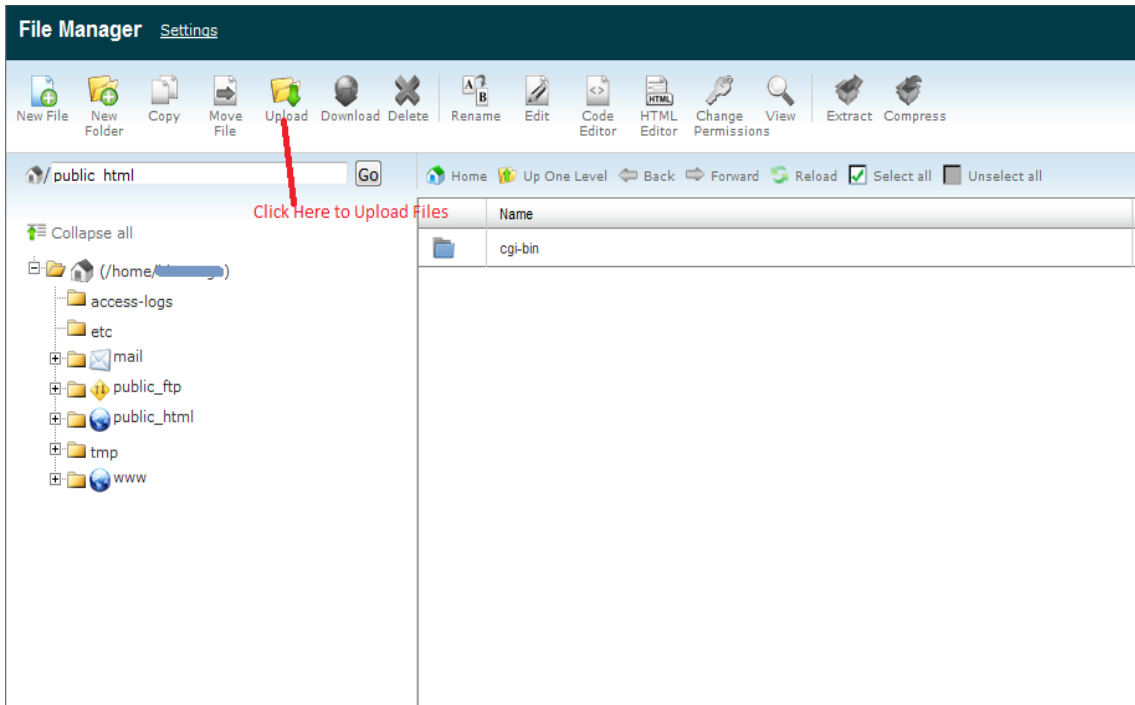

Please select a directory to open:

- Home Directory
- Web Root (public_html/www) Default Directory
- Public FTP Root (public_ftp)
- Document Root for: [blurred]

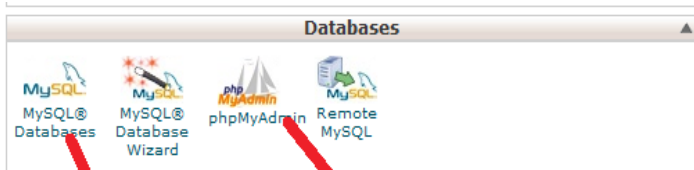

Show Hidden Files (dotfiles).

Skip this question, and always open this directory in the future when opening File Manager.

Go Click to Continue files upload/download

5. Database Creation/Management.

Click Here to Create the Database (for the first time)

Click here to go to the phpMyAdmin page (if the database is already created)

Create New Database

New Database: [Enter the Database Name](#)

[Click Here to Create the DB](#)

Remote MySQL Host

The mysql server's address is **dzoed.druknet.bt**. When connecting to the mysql server you must specify this host.

Current Databases

Search

DATABASE	SIZE	USERS	ACTIONS
There are no databases associated with your account.			

MySQL Users

[Add New User](#) [Jump to MySQL Databases](#)

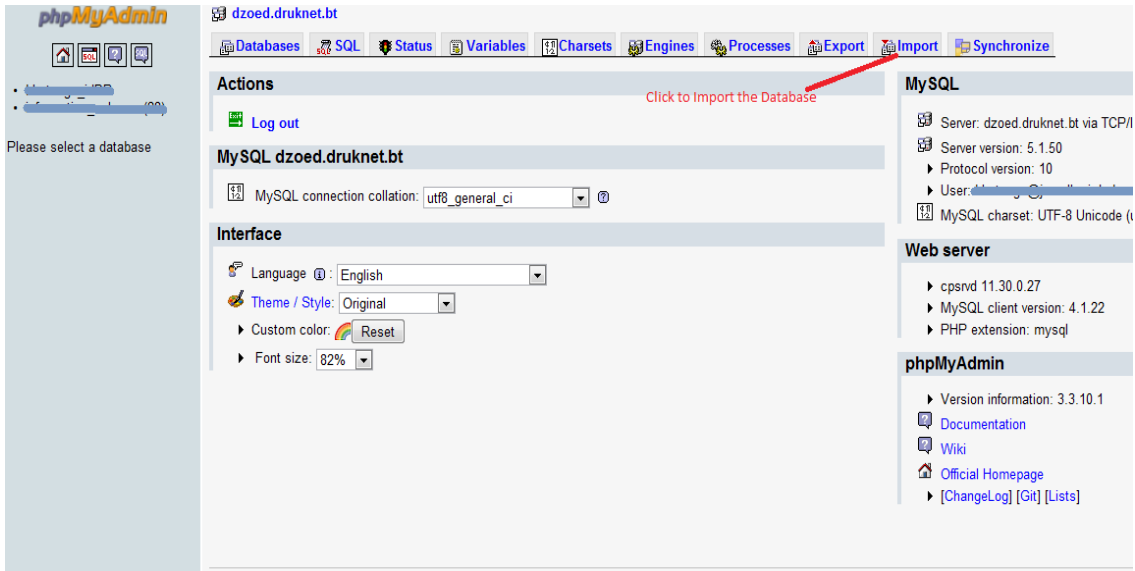

Username: [Enter the Database Username \(if required another\)](#)

Password:

Password (Again):

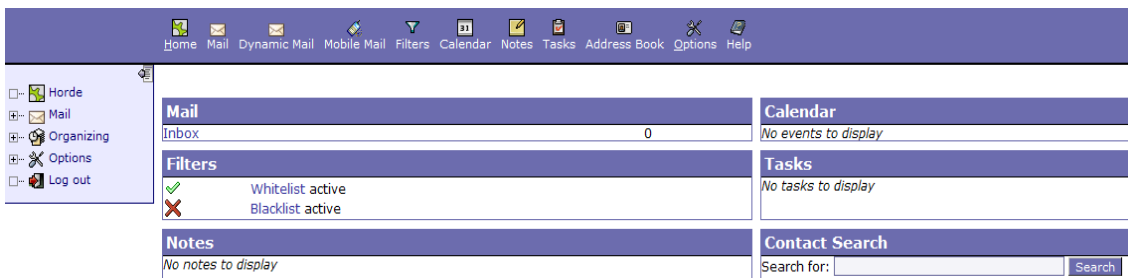

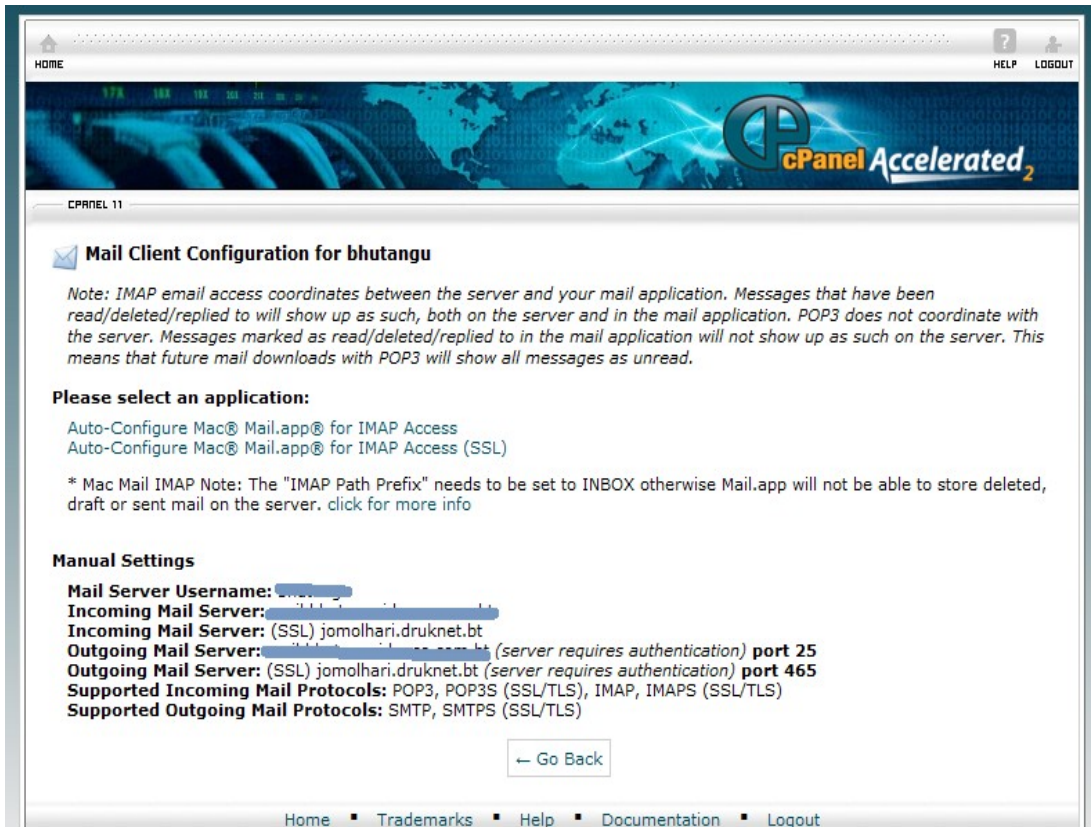

Strength (why?): [Click To get the password autogenerated](#)

6. Clicking on phpMyAdmin will redirect to the page where you can manage/import/export the database.

7. Going back to point No. 3, clicking on Login to WebMail will redirect to the mail configure/access page.

8. Editing the database connection

DB_Name = Refer DB created in point. 5

DB_Username/Password= Refer point. 3 under Login Details

DB_host = dozed.druknet.bt

9. Testing the site status. Please type the URL: <http://jomolhari/~username/>

10. Try to trace the logs in Error Logs under Logs.
